Project Design Phase-I

Proposed Solution Template

Date	9 November 2023
Team ID	Team-591562
Project Name	WCE Colon Curated Disease Classification using Deep Learning
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To analyse and detect the disease based on its pattern and be able to classify the image and generate the output.
2.	Idea / Solution description	We are developing a deep learning model to identify the patterns and classify the image accordingly.
3.	Novelty / Uniqueness	It can detect the disease and generate the report on spot and email the report to the patient's mail ID.
4.	Social Impact / Customer Satisfaction	The patient will be able to identify the disease and take cautions as prescribed by the doctor.
5.	Business Model (Revenue Model)	That depends on market demand, customer relationships, cost structure and etc.
6.	Scalability of the Solution	It can be adapted according to the convenience of the user.
